

Proposal to fix flooding and drainage issue.

70 Berkshire Road
Forrestfield

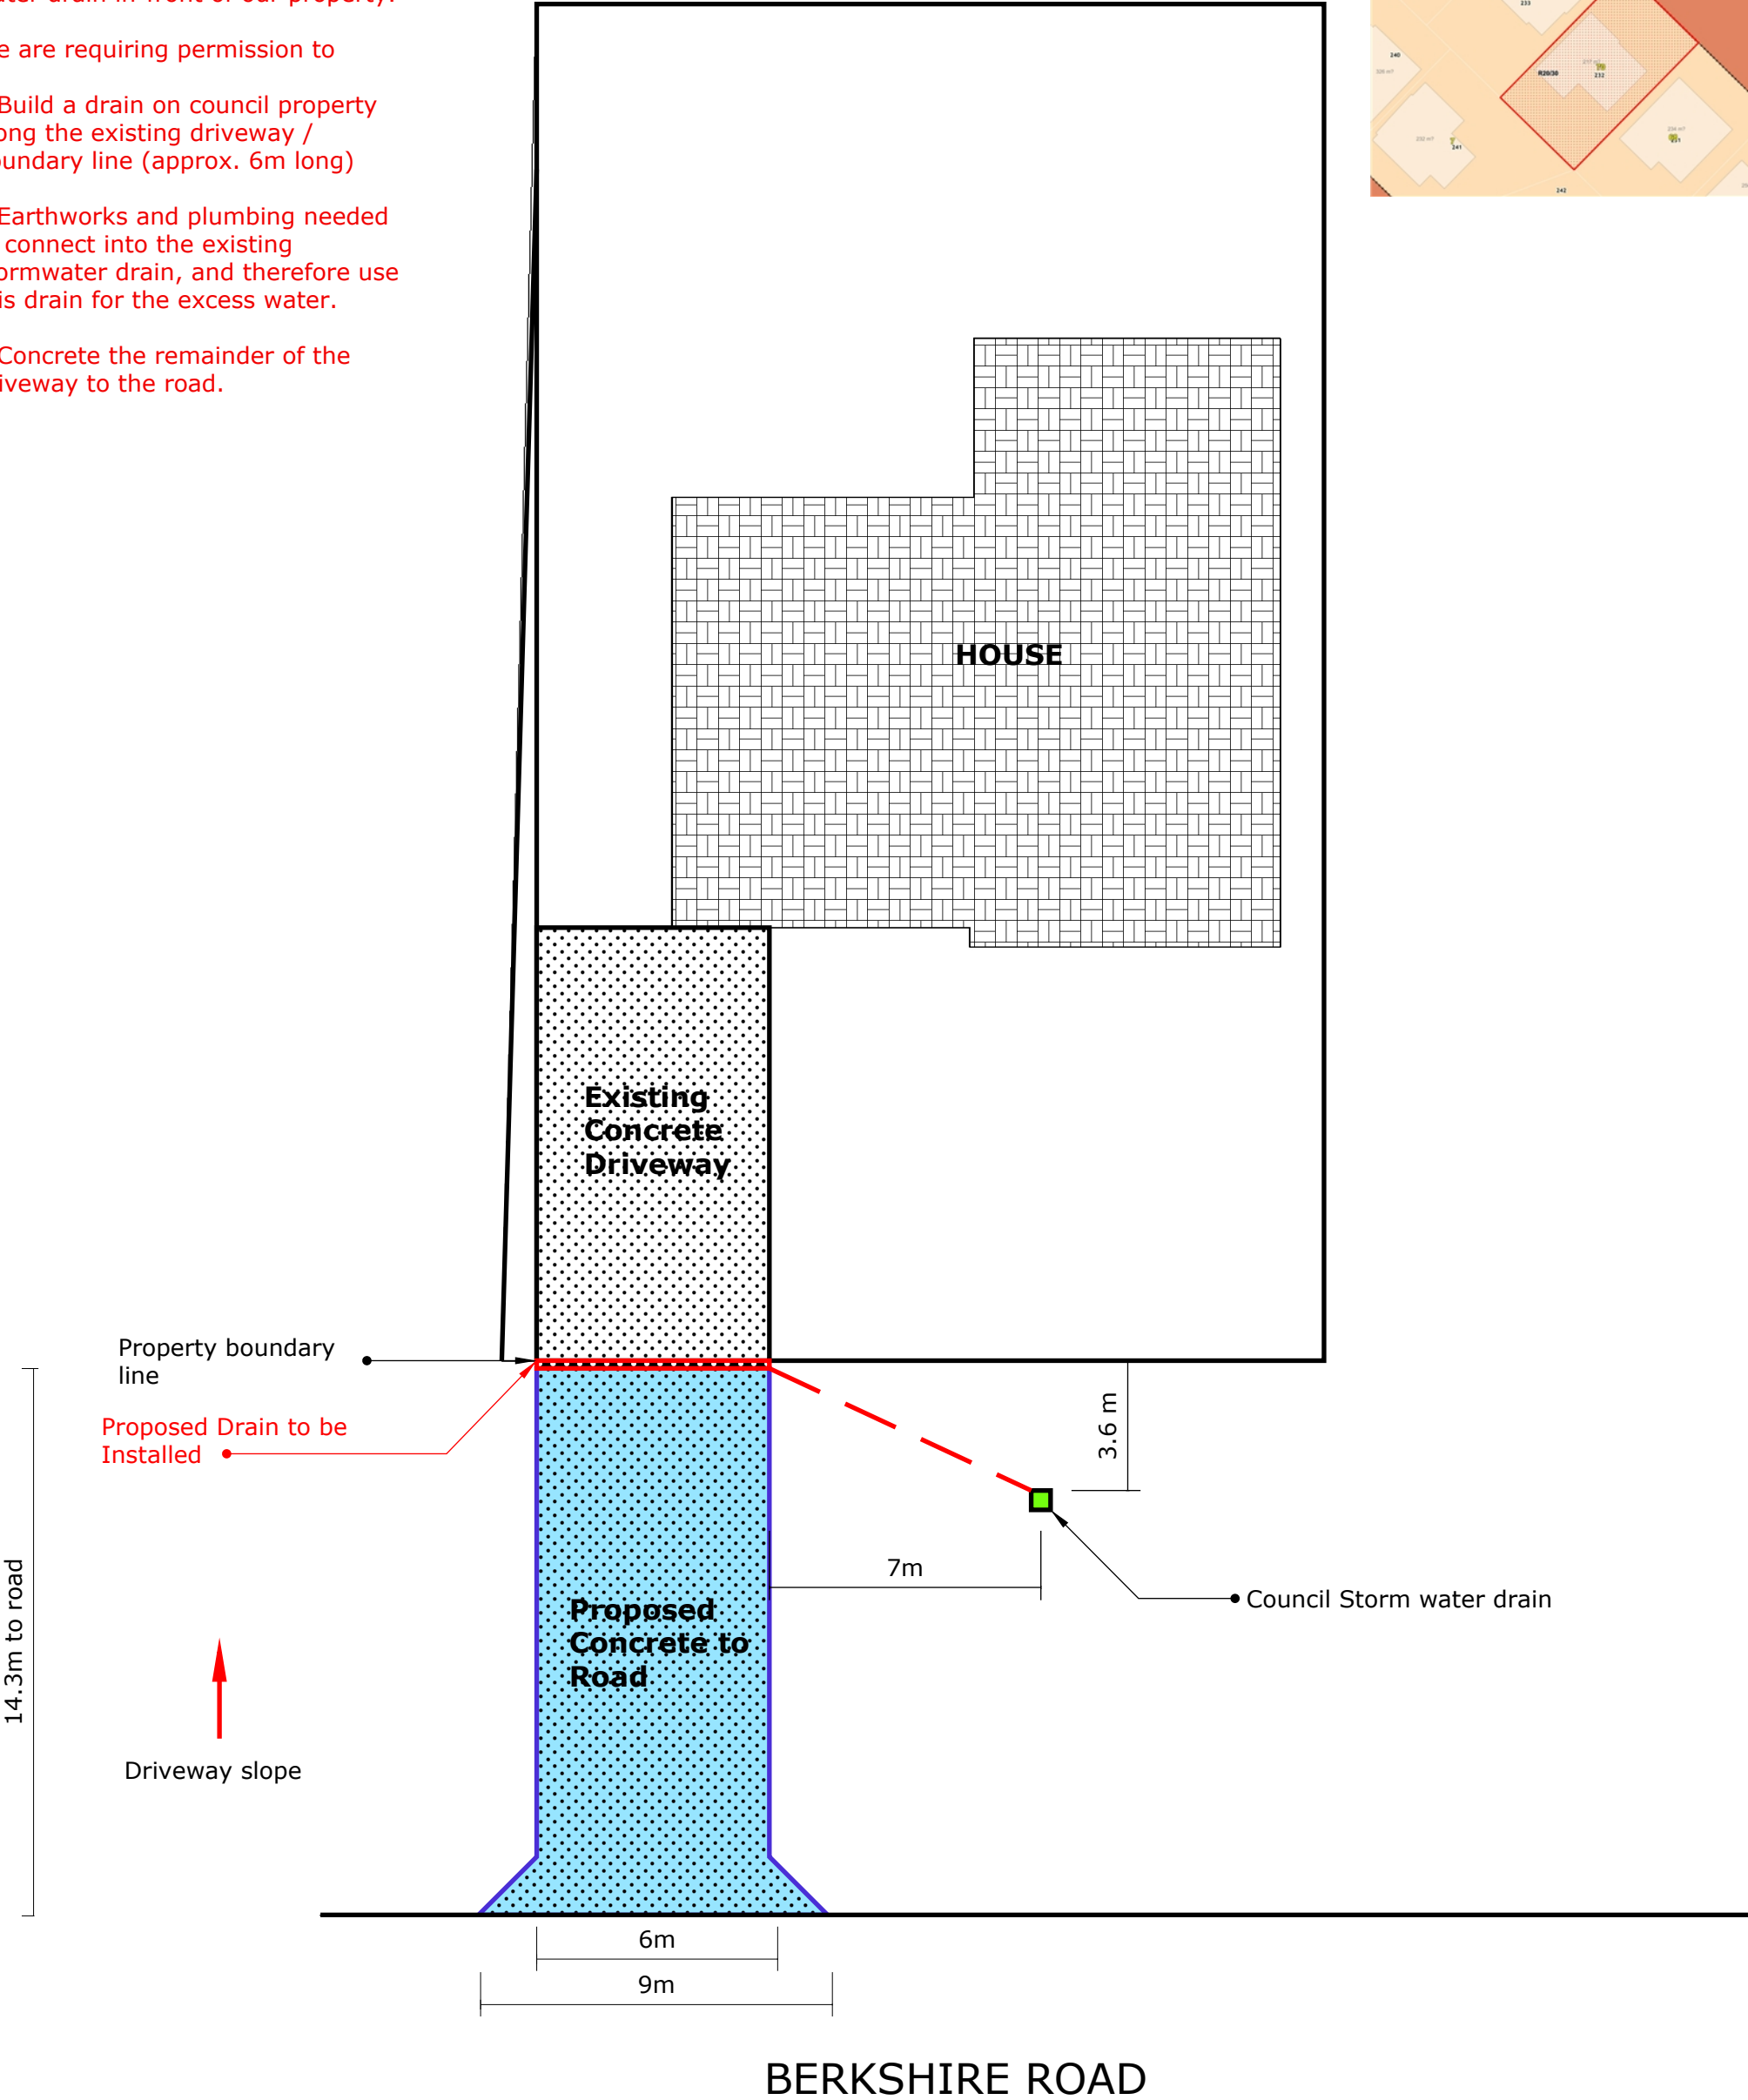

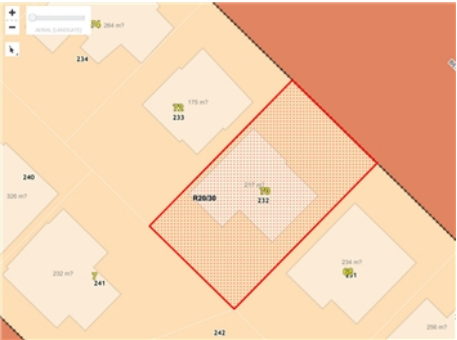

Proposal 01

70 Berkshire Road
Forrestfield

We would like to install a drain at the end of our existing driveway, with connecting plumbing that transfers the excess rainwater from the driveway into the existing storm water drain in-front of our property.

We are requiring permission to

- 1.Build a drain on council property along the existing driveway / boundary line (approx. 6m long)
- 2.Earthworks and plumbing needed to connect into the existing stormwater drain, and therefore use this drain for the excess water.
- 3.Concrete the remainder of the driveway to the road.

Proposed Plumbing to connect into council stormwater drain

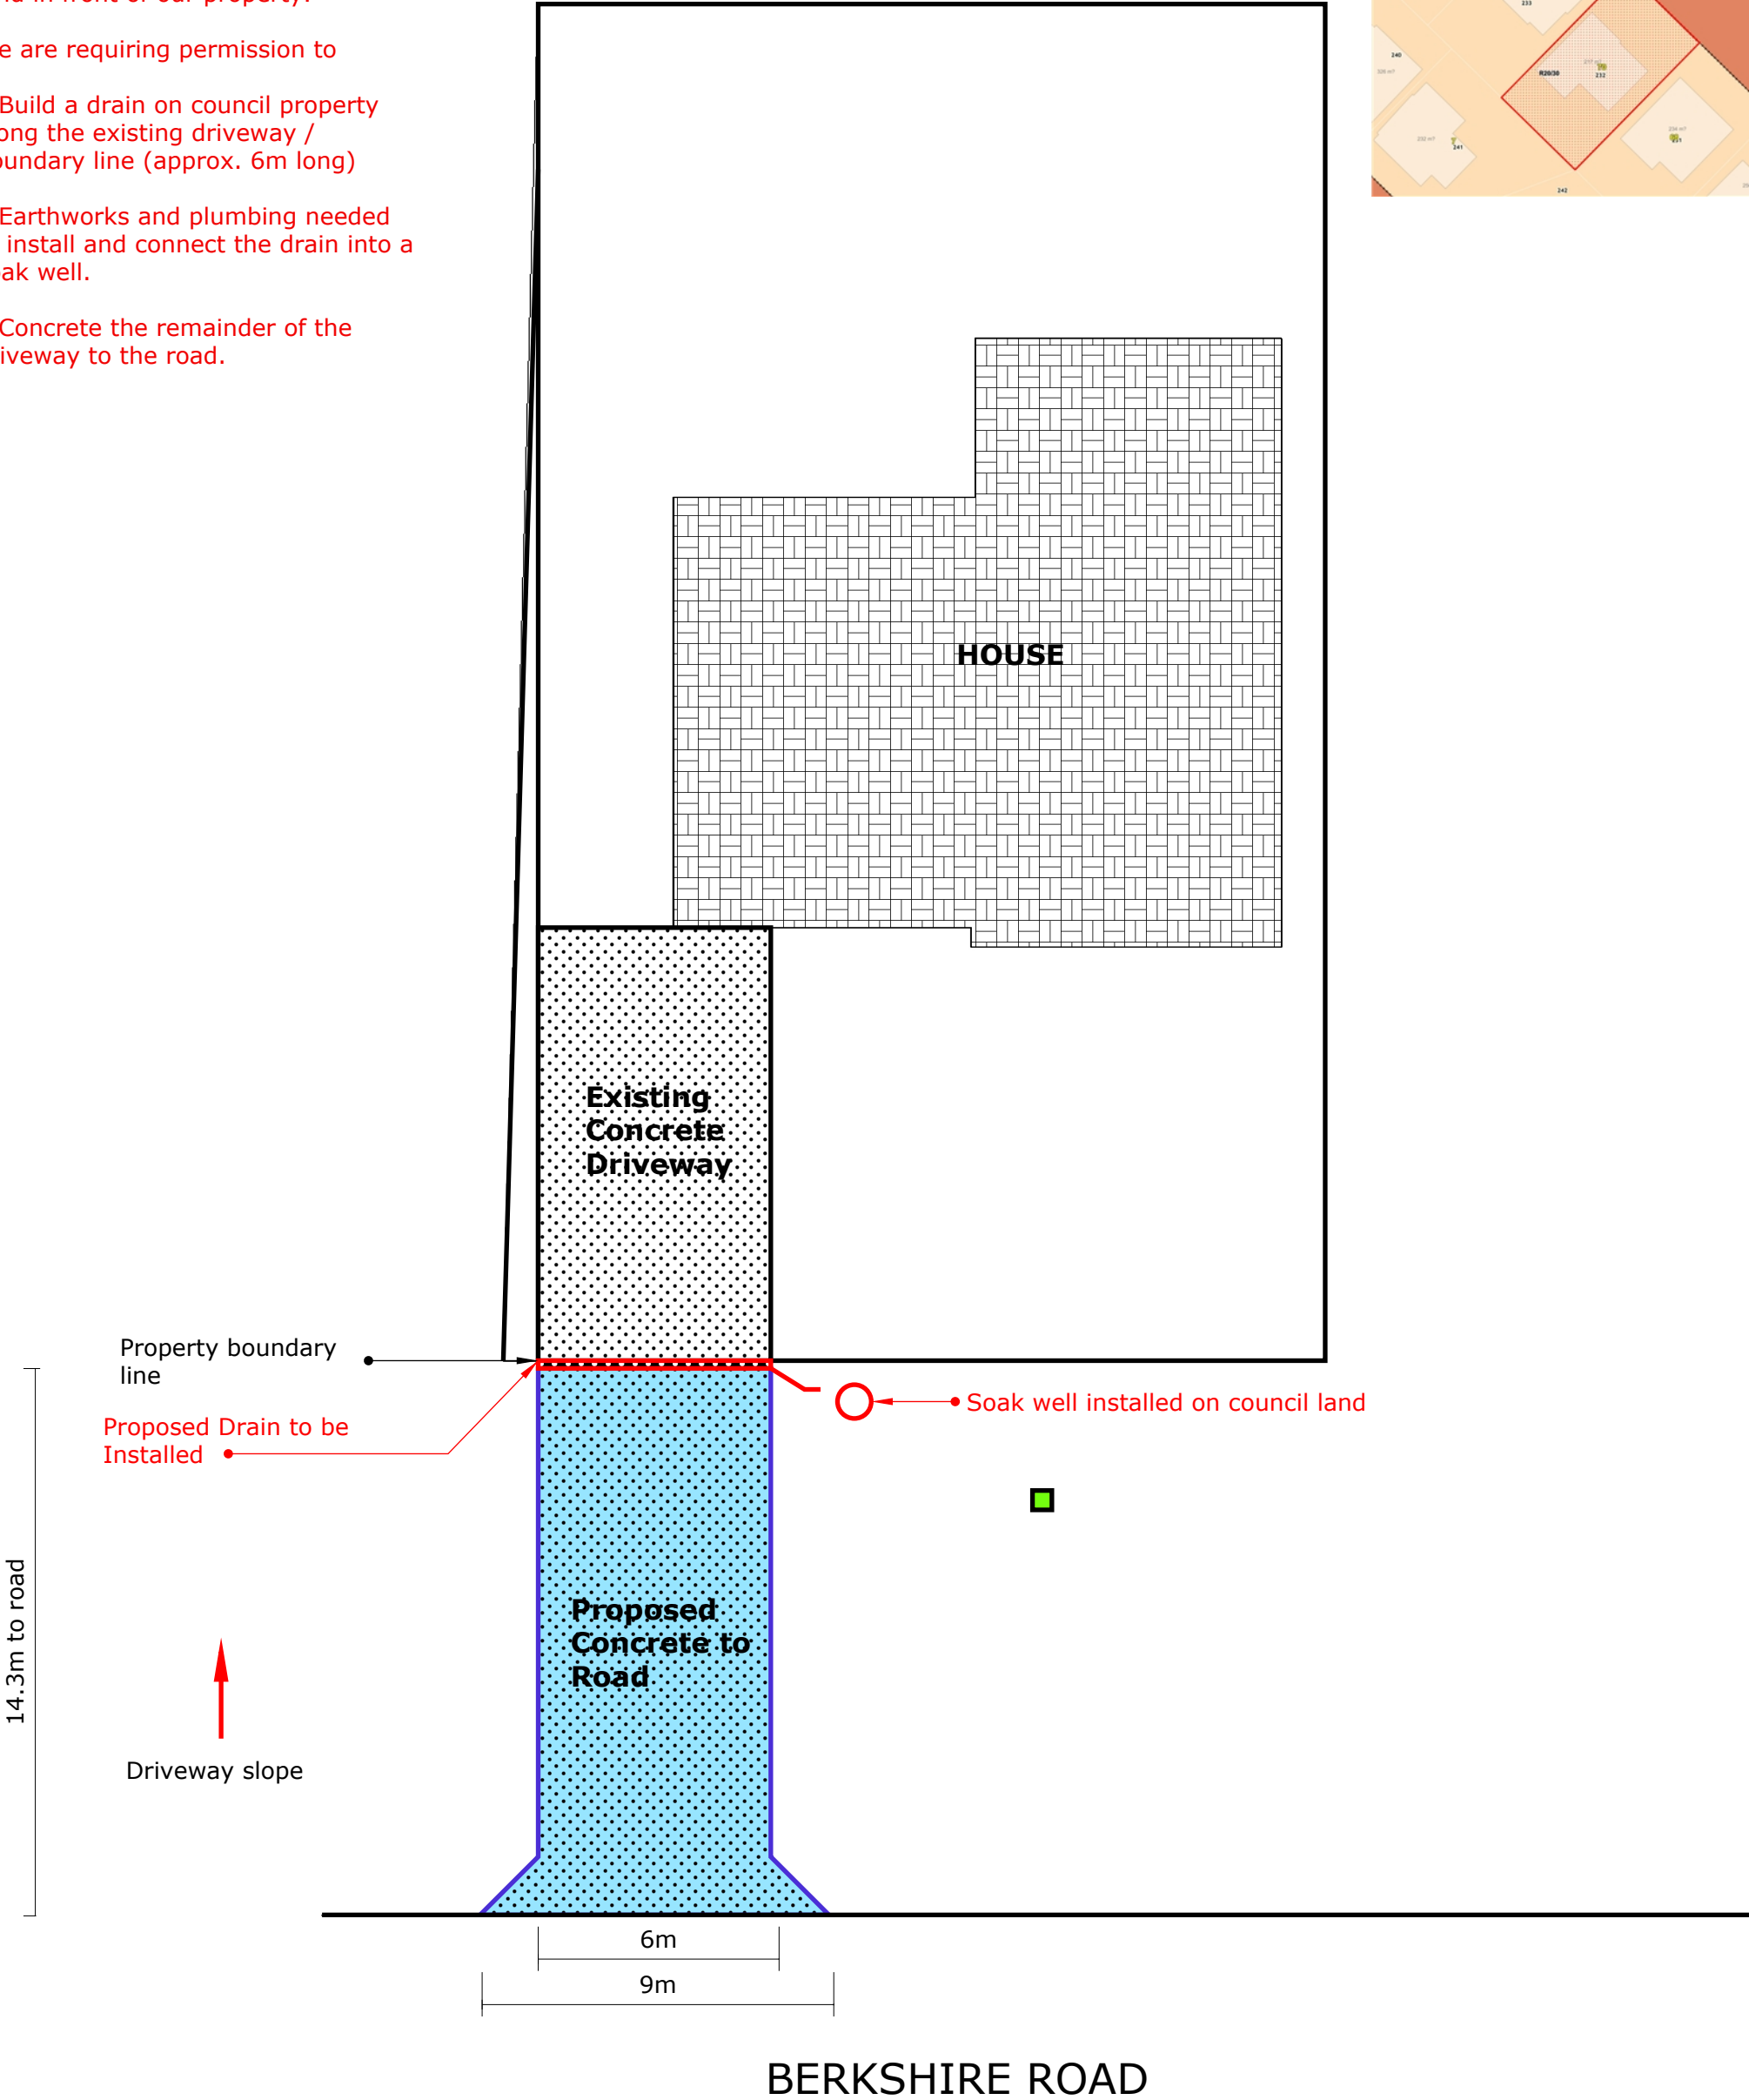

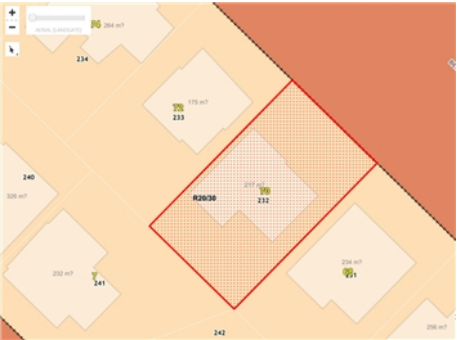

Proposal 02

70 Berkshire Road
Forrestfield

We would like to install a drain at the end of our existing driveway, with connecting plumbing that transfers the excess rainwater from the driveway into a soak well on council land in front of our property.

We are requiring permission to

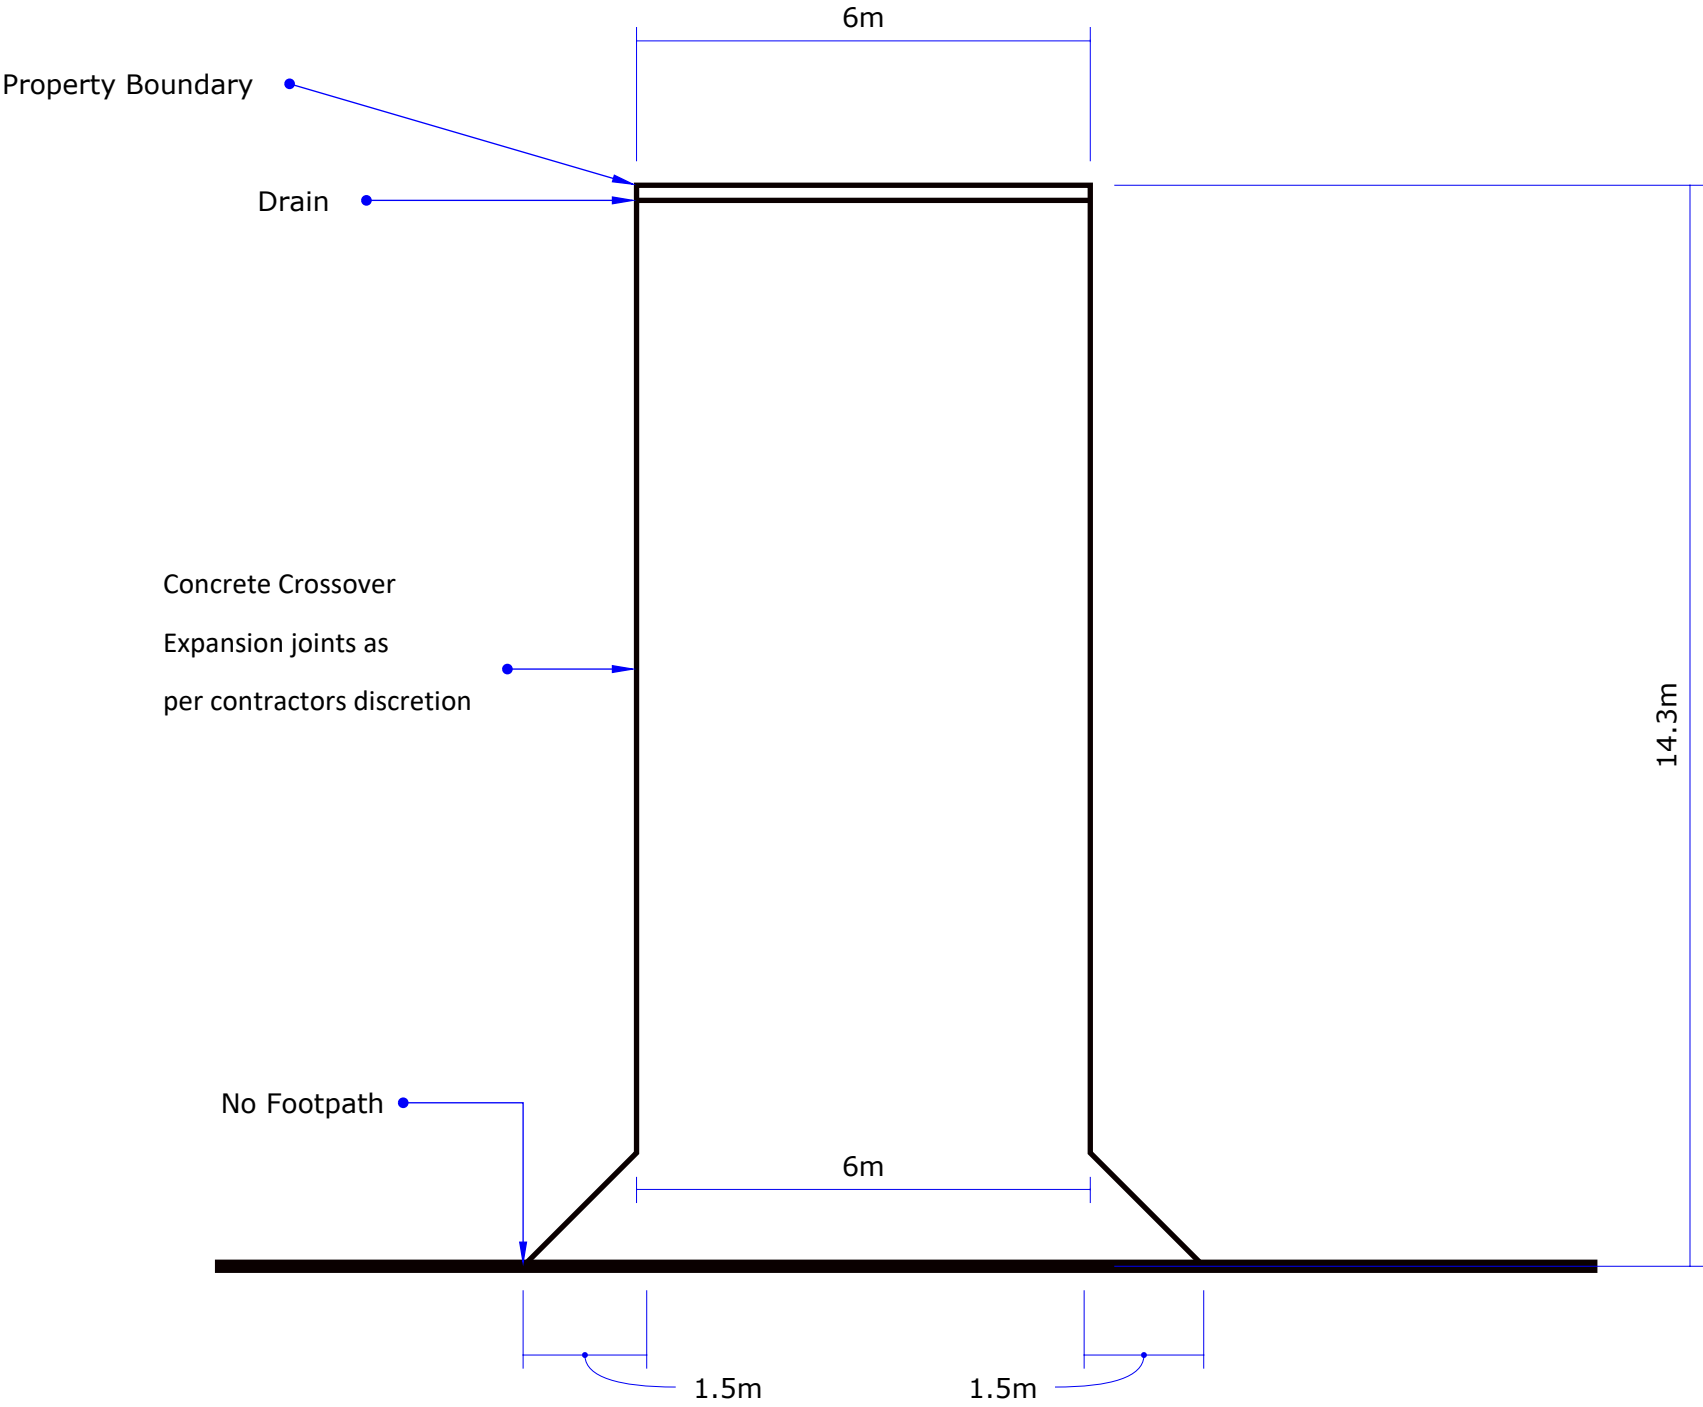

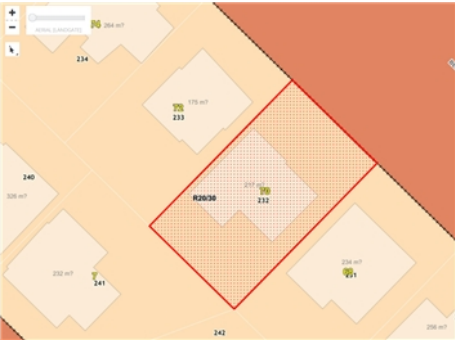

- 1.Build a drain on council property along the existing driveway / boundary line (approx. 6m long)
- 2.Earthworks and plumbing needed to install and connect the drain into a soak well.
- 3.Concrete the remainder of the driveway to the road.

Proposed Plumbing to connect into new soak well
